Report on the Use of One-off Grant for Promotion of Self-directed Language Learning (English Language)

During the academic year 2025–2026, no expenditure from the One-off Grant was made. The allocations originally planned for subscriptions and resources were found to be insufficient, as the amount could only cover a very small fraction of the subscription fees for students. Likewise, the budget for purchasing books would not have allowed each student to receive a copy, rendering the impact minimal. With inflation driving up costs across all areas, any partial spending during this period would have been insignificant and failed to achieve the intended objectives. Consequently, we would like to reserve the funds for 2026–2027, ensuring that students can be fully subsidised and benefit meaningfully from the resources, activities and experiential learning opportunities supported by the grant.
